PORTFOLIO WEBSITE: <https://suhas030.github.io/Suhasg/Portfolio/> 🔗

PROFESSIONAL SUMMARY

Cyber Security Engineer with hands-on experience in Web, Mobile, API and Network security assessments. Skilled in manual, automated, and AI-integrated vulnerability discovery, penetration testing, and security validation across enterprise and government environments. Active Bug Bounty Hunter with expertise in identifying high-impact vulnerabilities, security assessments, technical reporting, and secure remediation.

EXPERIENCE

Blipsnip consultancy with Cybivalu, Cybersecurity Intern

04/2025 – 07/2025

Bengaluru

- Assisted in Web Application VAPT.
- Performed OWASP Top 10 testing.
- Used Burp Suite, OWASP ZAP, Nmap and Wireshark.
- Participated in report preparation and remediation validation.

Deccan Infotech Pvt Ltd, Cyber Security Engineer

10/2025 – 04/2026

Bengaluru

- Conducted 80+ Web, Mobile, API, Network, and Thick Client security assessments through Black Box and Grey Box testing, delivering detailed technical reports with remediation recommendations.
- Developed AI-assisted workflows to streamline VAPT activities, automate repetitive tasks, and improve vulnerability validation while identifying OWASP Top 10 and business logic vulnerabilities.
- Performed security assessments for enterprise and government projects supporting regulatory compliance requirements, including UIDAI (AUA/KUA/KYC), RBI, NPCI, SEBI, and related system audits.
- Collaborated with developers, project managers, security teams, CISOs, auditors, client stakeholders, and government officials throughout VAPT engagements, remediation, and compliance audit processes.

Self-Employed | Hacker One, Bug Bounty Hunter

11/2025 – Present

Remote

- Reported valid security vulnerabilities across 15+ organizations, earning \$4,000+ in rewards through responsible disclosure and receiving acknowledgements.
- Performed manual security testing of Web Applications and APIs, focusing on identifying high-impact vulnerabilities through reconnaissance, application analysis, and business logic testing.
- Hands-on experience identifying Authentication, Authorization, Access Control, GraphQL, Information Disclosure, and Business Logic vulnerabilities across diverse technology stacks.

TECHNICAL SKILLS

Programming Languages: Java, SQL, Python, JavaScript, HTML

Operating Systems: Windows, Linux (Kali, Ubuntu)

Dev Tools: Visual Studio Code, GitHub, Android Studio

Cybersecurity Knowledge: Network Fundamentals, Cybersecurity Principles, VAPT

Security Tools & Tech: Burp Suite Professional, Nmap, OWASP ZAP, Nuclei, FFUF, Gobuster, SQLMap, Metasploit, MobSF, Amass, Waybackurls, GAU, Frida, MOBSf, etc..

EDUCATION

PES University Master of Computer Applications (MCA) CGPA: 7.37	2024 – 2025 Bengaluru
K.L.E's College of BCA Bachelor of Computer Applications (BCA) CGPA: 7.56	2020 – 2023 Dharwad

CERTIFICATIONS

- Certified Ethical Hacker - CEH
- Google - Foundations in CyberSecurity [↗](#)
- TCS ION Career Edge - Young Professional
- Ethical Hacking Essentials - EHE [↗](#)
- EC-Council | SQL Injection Attacks

ACHIEVEMENTS

- Top 1 Researcher in a Private HackerOne Program
- Top 6% on TryHackMe
- ALL State 411 Rank - PGCET
- Awarded for Excellence in Placements during the BCA degree

PROJECTS

Hungry Heart - Online Restaurant Ordering System

Developed an online food ordering web application for restaurant tables using HTML, CSS, JavaScript and Forms Pree for order capturing. Ensured responsive design and seamless order management for restaurant administrators.

Medicine Tracking System

Created a web application for tracking medicine schedules and reminders using PHP, MySQL backend and HTML/CSS/JavaScript frontend. Enabled users to efficiently manage medication routines and receive timely notifications.
