PORTFOLIO WEBSITE: <https://suhas030.github.io/Suhasg/Portfolio/> 🔗

PROFESSIONAL SUMMARY

Cyber Security Engineer focused on Offensive Security, with over 1 year of experience in penetration testing and security assessments across Web Applications, APIs, Mobile Applications, and Networks. Skilled in manual testing, automation, and AI-assisted security testing, with a strong focus on practical vulnerability discovery. Part-time security researcher and bug bounty hunter, continuously researching and hunting for real-world vulnerabilities.

EXPERIENCE

Blipsnip consultancy, Cybersecurity Intern

04/2025 – 07/2025
Bengaluru

- Supported Web Application VAPT and OWASP Top 10 testing using Burp Suite, OWASP ZAP, Nmap, and Wireshark, with contributions to vulnerability reporting and remediation validation.

Deccan Infotech Pvt Ltd, Cyber Security Engineer

10/2025 – 04/2026
Bengaluru

- Conducted 60+ VAPT and Penetration tests assessments across Web Applications, Mobile, APIs, Networks, and Thick Clients using White, Black, and Grey Box methodologies.
- Assessed vulnerabilities against OWASP Top 10, SANS Top 25, NIST, and CIS frameworks, performing CVSS-based risk ratings, root-cause analysis, and remediation recommendations.
- Built AI-assisted VAPT workflows to automate repetitive security testing, accelerate vulnerability validation, and improve assessment efficiency.

Self-Employed, Bug hunter

11/2025 – Present
Remote

- Conducted independent security research through HackerOne and Bugcrowd, identifying and responsibly reporting vulnerabilities across 20+ organizations with 10+ Hall of Fame acknowledgements.
- Researched Web Applications and APIs, focusing on high-impact vulnerabilities across authentication, authorization, access control, GraphQL, information disclosure, and business logic.

TECHNICAL SKILLS

Cybersecurity

Ethical Hacking, Vulnerability Assessment, Threat Modeling, Risk Assessment, SSDLC

Programming

Python, Java, SQL, JavaScript, HTML

Dev & Testing

Visual Studio Code, GitHub, Android Studio, Postman

Network Security

Network VAPT, Nessus, Qualys, Nmap

Security Tools

Burp Suite, OWASP ZAP, Nuclei, SQLMap, FFUF, Metasploit, Hydra, Hashcat, Katana, Maltego

Web Security

OWASP Top 10, SANS Top 25, CMS Testing, AI-Assisted Security Testing

API Security

REST, SOAP, GraphQL, API Authentication & Authorization

Mobile Security

Frida, Objection, MobSF, APKTool, Apk-mitm, SSL Pinning Bypass

Code Review

SonarQube, AI-Assisted Code Review

AI Security

Prompt Injection, Jailbreaking

EDUCATION

PES University

Master of Computer Applications (MCA)
CGPA: 7.37

2024 – 2025

Bengaluru

K.L.E's College of BCA

Bachelor of Computer Applications (BCA)
CGPA: 7.56

2020 – 2023

Dharwad

CERTIFICATIONS

- Certified Ethical Hacker (CEH v13) | EC-Council
- Foundations in CyberSecurity | Google [↗](#)
- TCS ION Career Edge - Young Professional
- Ethical Hacking Essentials - EHE | EC-Council [↗](#)
- SQL Injection Attacks | EC-Council

ACHIEVEMENTS

- 10 Hall Of Fame for Vulnerability Disclosure
- Top 6% on TryHackMe
- ALL State 411 Rank - PG CET
- Awarded for Excellence in Placements during the BCA degree

PROJECTS

Rudr-Recon

Developed a **Go-based reconnaissance and security assessment tool** that automates subdomain enumeration, DNS resolution, HTTP/HTTPS probing, crawling, JavaScript analysis, endpoint extraction, technology-based fuzzing, and structured vulnerability reporting.

Break-JWT, (in-progress)

Developing a **comprehensive JWT security testing tool** covering algorithm and signature weaknesses, including alg:none, algorithm confusion, secret strength testing, token decoding/encoding, and other JWT attack scenarios.

Hungry Heart - Online Restaurant Ordering System

Developed an online food ordering web application for restaurant tables using HTML, CSS, JavaScript and Forms Pree for order capturing. Ensured responsive design and seamless order management for restaurant administrators.

Medicine Tracking System

Created a web application for tracking medicine schedules and reminders using PHP, MySQL backend and HTML/CSS/JavaScript frontend. Enabled users to efficiently manage medication routines and receive timely notifications.
